

Solutions

Pinnell has been providing technology solutions to the Eastern & Central Washington and Eastern Oregon Community since 1937. From document management to multifunctional systems, we provide the broadest portfolio of technology and services for companies of any size and industry.

Pinnell assists customers with an overall solution based on a consulting approach to your business. We assess all workflows and create a method of maximizing productivity and making you more efficient. By truly understanding your business and goals, we outline ways of utilizing technology to achieve those goals. To bring value to our customers, we leverage beneficial alliances, industry leading devices and our professional consulting services to help streamline your business processes - saving you time and money.

Part of our assessment is finding new ways to utilize technology to maximize efficiencies. With this in mind we team up with a variety of partners that allow us the power to provide the total solution.

eCopy™
MAKING PAPER WORK™

Document Management System

Xerox DocuShare is a browser based document management system with full text searching, check in/out collaboration, digital workflow, email integration and complete content management.

Scanning Solutions

Document routing and processing software that allows you to use your Xerox MFD to scan into many popular document management systems, OCR documents on the fly, and BROWSE your network for quick distributed scanning.

Scanning Solutions

Designed for medium, large and enterprise-class organizations with multiple business software applications and network repositories, eCopy ShareScan Suite converts paper documents into electronic files for immediate distribution, collaboration or storage.

Xerox
SMARTdocument Travel™
Powered by AutoStore™

Recognition and Data Capture

Leading high volume recognition and data capture software that can extract data automatically and export, process them into various digitized formats, and then route them to virtually any destination – including most of today's leading document management systems.

Document Routing and Processing

Xerox SMARTdocument Travel™ is document scanning software for organizations with paper-intensive processes. This Xerox workflow solution automates and simplifies document capture, processing and routing of information.

Print Tracking Suite

Powerful suite of print management tools that enables organizations worldwide to significantly lower the cost and environmental impact of printing.

Cost & Access Control

Equitrac Office provides end users with a secure, convenient and mobile print workflow while controlling costs and simplifying administration of your output fleet. Equitrac Office enables single sign-on access to devices and services, personal print queues to maximize document security and mobility, and rules to create cost-effective printing behavior.

Access Control

Implement pin, password or card-based user identification that allows users to login at the MFP. Multiple workflow enhancements with such features as Follow-You™ print that allows print jobs to be securely retrieved at any Secure-Access enabled device, ideal for remote and mobile workers. Enable personalized scan templates and automated workflows based on the user's credentials. This feature is available with select scanning solutions such as ScanFlowStore™.

Desktop Application Suite

Nuance solution that transforms paper-based documents into editable file formats. Create and edit PDF documents with automatic conversion to fully text searchable formats such as Microsoft® Word and Excel.

SHARP

imaudit™

Desktop Application

SimplifyScan offers you the possibility to easily integrate scanned documents into your business processes. Capture your documents from anywhere and store them directly in the application you use. All scanned documents are text searchable and easy to retrieve.

Desktop Application

Sharpdesk software is an easy to use desktop-based, personal document management application that lets users browse, edit, search, compose, process and forward scanned and native electronic documents.

Remote Meter Collection

FM Audit is an easy and effective way of managing all the output devices on your network. With automatic discovery and meter collection, along with the ability to set thresholds for toner and ink reordering, it is an integral part of our print management services.

We provide a total solution to maximize productivity and make your workflow more efficient.
